HR Alliance Compensation Survey & Trend Report

The HR Alliance DC Compensation Survey, now in its 34th year, can help you attract and retain the DC-metro area's top talent, while helping your organization continuously improve its compensation practices and talent management strategies.

In 2022, we compiled data on over **400** positions across over **75** job families covering over **51,000** incumbents in the Greater Washington, DC metro area.

Here is a sample of the findings:

- DC area turnover continued to be significantly lower than the average for the entire US.
- The survey saw an increase in investment in Talent Acquisition, with over **45%** of organizations reporting it as their top area of investment for their Human Resources Departments.
- This year **53%** of companies have reported that they see about the same levels of productivity from employees working remotely as they do from those working on-site.
